PROFILE

I have hands-on experience building Linux-based trading systems, ML & DL modeling for HFT and Arbitrage Strategy. Recently, I graduate from NYCU Institute of Statistics. My background includes multi-asset, multi-region trading experience across equities, futures, options, and crypto. I specialize in statistical, ML modeling, and Arbitrage analysis.

WORK EXPERIENCE

May 2025- Dec 2025 (8mo)

Quant Trading Intern at Bincentive

Focus on quantitative research for cryptocurrency, Including modeling for options pricing, cross-market and DeFi arbitrage, and dynamic risk-management strategies.

Apr 2025- Jul 2025 (4mo)

Quant Trading Intern at SQM technologies

Conducted deep learning model training on the Taiwan stock market using Limit Order Book (LOB) data, with a focus on model ensembling and modular transformation techniques.

Feb 2025- Apr2025 (3mo)

Independent Full-Stack Developer & Quantitative Researcher

Developed an application by quantitative research on the Taiwanese index options market on Linux via GCP, incorporating secure authentication and monitoring solutions.

Mar 2025- Dec 2025 (10mo)

Consultant at WorldQuant

Factor Analysis, Financial Analysis, Alpha Searching

EDUCATION

Sep 2023- Jun 2025

MS, Statistics, NYCU

GPA: 3.93

Thesis Topic: Integrating Noise-Reduction Techniques and Machine Learning Models for Enhanced Intraday Trading

Courses: Statistic Calculate, Financial Statistics, ML, Adv. Algorithm

SIDE PROJECT

DeFi Arbitrage Monitor

CEX Stable Coin Arbitrage

HFT Data Collector

Taiwan Option Trading System

LICENCES

Gold Consultant (WorldQuant Brain)

Qualification Exam for Futures Specialist
